

MERCK MORE THAN A MOTHER

Together we can create a culture shift

SAVE THE DATE

Friday 31st of March 2017

Kuala Lumpur
Convention Center
Conference Hall 1

Kuala Lumpur, Malaysia

15:30hrs - 17:00hrs

In many cultures, childless women suffer discrimination, stigma and ostracism. "MERCK MORE THAN A MOTHER" initiative aims to empower infertile women through access to information, education, health and change of mind-set.

"MERCK MORE THAN A MOTHER" will support Governments to define policies to improve access to regulated, safe and effective Fertility care and address the need for interventions to break the stigma around infertile women and the necessity for a team approach to family building among couples. In partnership with Academia and Regional International Fertility Societies, it will also provide medical education and training for healthcare providers and embryologists to build fertility care capacity in Africa and developing countries.

Through this initiative, together with our partners, we will address the key challenges that are associated with resource constrained settings such as prevention of infertility, education, self-development, ART/IVF regulation, geographic barriers, and limited resources arguments.
